

# BORIC OXIDE

## Anhydrous Boric Acid

Rose Mill Company is the largest independent producer of boric acid powder in North America. We process boric acid daily and boric oxide on an "as-needed" basis from stocked material ensuring a fresh product with longer shelf-life. Boric oxide is used in the manufacturing of specialty glasses, ceramics, and enamels as well as a source of boron for other chemical compounds. Boric oxide is hygroscopic and may become caked if not properly stored.

Rose Mill stocks boric oxide and offers custom powdering and packaging to meet your specifications. Contact us for details.
